

# Guardian PROTECTION

Guardian Protection provides security solutions to multi-location businesses nationwide using industry-leading technology. We're privately owned, 100% percent U.S.-based, and highly respected in the security industry.

Tell us your challenges and we'll design security and alarm monitoring solutions that suit your business needs, budget, and schedule.

## AWARD-WINNING MONITORING

Guardian Protection owns and operates two Five Diamond Certified U.S.-based monitoring centers meeting the strictest industry standards. Guardian was named "Monitoring Center of the Year" by The Monitoring Association twice in the last five years.

## BOUTIQUE SERVICE

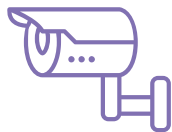

When you choose Guardian, you gain a dedicated project manager as your point-of-contact to oversee plans and ensure installations are completed correctly and on time. We also offer a VIP Customer Hotline exclusively servicing our commercial customers. One call connects you to live U.S.-based experts, 24/7.

**In addition to award-winning security, professional installation, and 24/7 monitoring, you could also get:**

### Intrusion Detection

Security systems with motion detectors & 24/7 professional monitoring.

### Video Surveillance

Proactive protection with two-way audio and smart video analytics.

### Access Control

Touch-free card readers for secure, scalable access control.

### Fire Detection

Annual inspections, 24/7 monitoring, and reliable detection systems help keep your business compliant and protected

### Remote Site Management

Access your system, manage users, and track efficiency—anywhere.

# Proactive Video Surveillance:

## Stop crime before it happens.

Proactive video surveillance uses smart detection and live monitoring to prevent crime in real time — not just record it.

### HOW IT WORKS

#### AI-Powered Detection

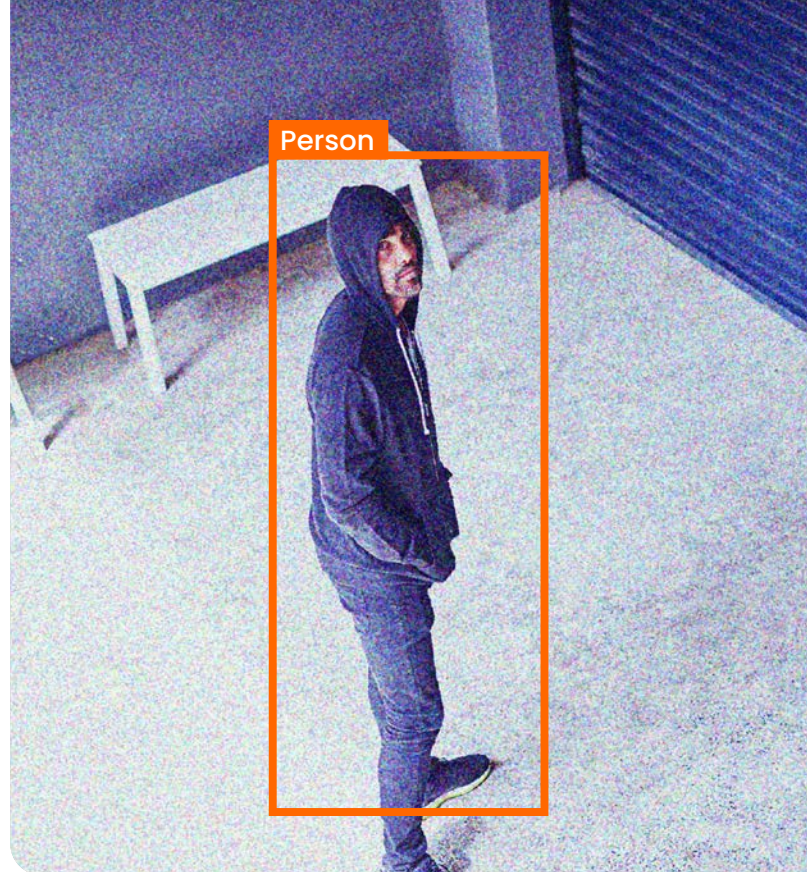

Our system analyzes live video to identify real threats, reducing false alarms.

#### Live Agent Response

Trained security professionals monitor your business in real time, ready to take action.

#### Instant Alerts & Intervention

If suspicious activity is detected, we can alert authorities, notify key personnel, or activate deterrents.

### KEY BENEFITS

#### After-Hours Monitoring

We keep watch even when your team clocks out, reducing vulnerability during off-hours and holidays.

#### Live Intervention

Agents can talk through your cameras, trigger warning sounds, or turn on lights to deter intruders

#### Watch Vulnerable Areas

Keep an eye on high-risk zones like dumpsters, loading docks, and rear entrances—where trouble often starts.

#### Event Context with Smart Clips

Video events include footage from before and after an incident, helping quickly verify and respond to threats.

#### Controlled Access & Transparency

You decide which cameras are monitored. Every action taken by our agents is logged and visible in your activity feed.

#### Enhanced Incident Response

Operators can unlock doors or guide responders to the scene—helping limit damage and support faster resolution.

# Visual Verification:

## Get faster, smarter emergency response.

Visual verification uses your security cameras to confirm alarm events when they happen – helping first responders prioritize your call.

### HOW IT WORKS

#### Instant Video Verification

Our monitoring center receives clips showing what happened before and after the alarm.

#### Live Camera Access

Agents view live footage to evaluate threats as they happen.

#### Real-Time Threat Assessment

Footage access allows our team to identify real threats fast.

#### Two-Way Talkdown

If a threat is confirmed, agents speak directly through your cameras.

#### Faster Emergency Response

Our proactive approach helps speed up emergency response when every second counts.

### KEY BENEFITS

#### Visual Confirmation of Activity

When an alarm is triggered, it delivers visual cues to verify what's taking place at your property.

#### Faster Alarm Assessment

Real-time video and contextual data enable quicker evaluation of alarm events by the monitoring center.

#### Priority Police Response

Verified alarms are commonly taken more seriously by authorities, leading to quicker action.

#### Two-Way Talk Down

Enables voice interaction from monitoring specialist once an intrusion has been visually verified.

#### Minimize False Dispatches

Visual and voice confirmation aids in determining genuine threats from false triggers, reducing unnecessary responses.

# Remote Site Management: Made Simple

Gain total control over your business security systems – anytime, anywhere. Whether you're managing one location or a nationwide chain, Guardian's remote management tools help you keep an eye on your operations from wherever you are.

## All-in-One Dashboard

View security activity across all your locations in one place with visual summaries – accessible through convenient single sign-on.

## Mobile Control

Arm/disarm, lock doors, view cameras, and manage alerts directly from your phone.

## Instant Alerts & Activity Reports

Get notified about arming, disarming, open/close events, alarms, power outages, and unexpected activity.

## Real-Time Video Surveillance

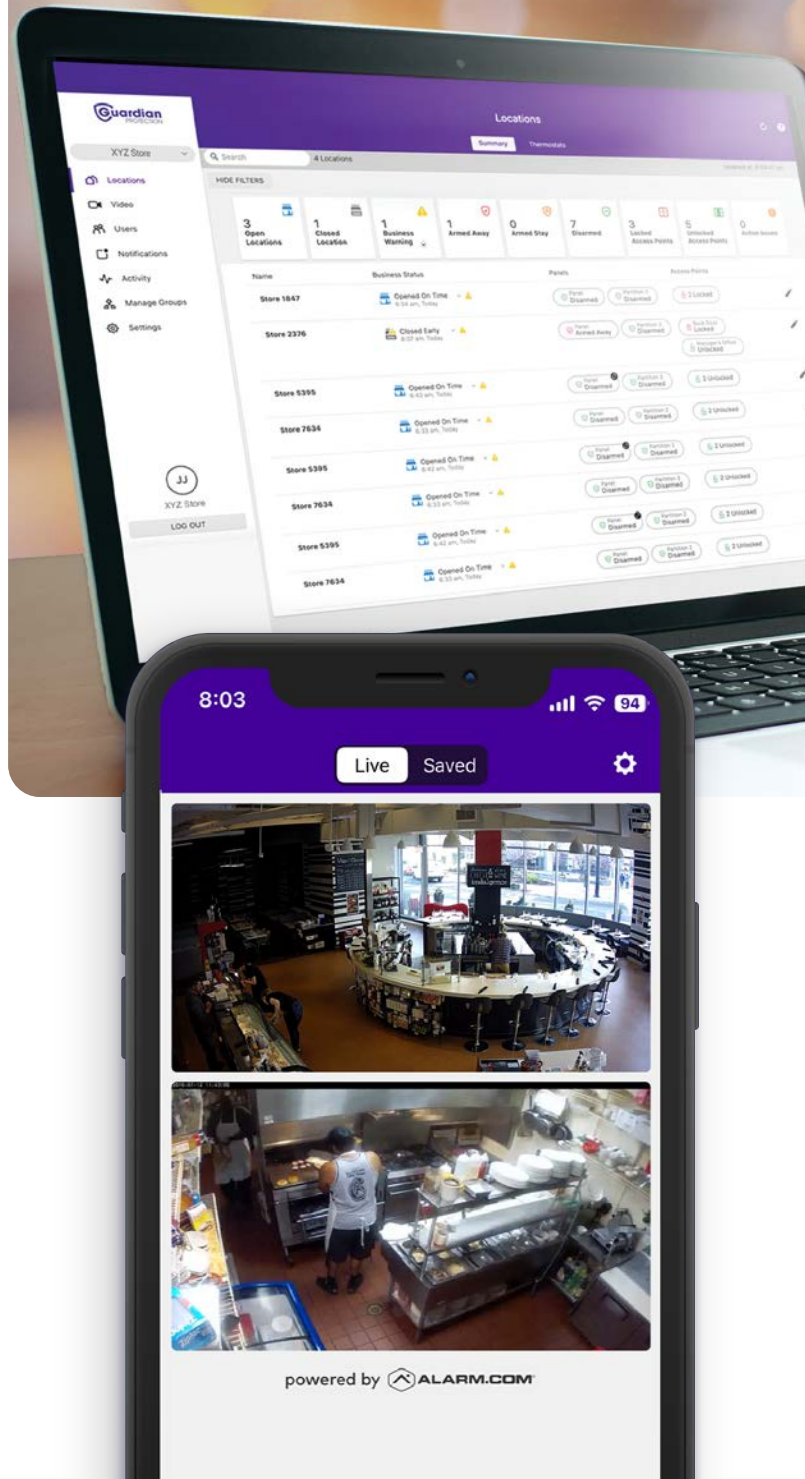

Monitor live and recorded video feeds from your security cameras – no need to be on-site.

## Smarter Business Insights

Make data-driven decisions using activity reports and trends across your locations.

## User Management Made Easy

Add, delete, and update access credentials or alarm codes remotely with just a few clicks.
