

OPERATIONAL ANALYTICS

Customer Walk-in Count

Improve operational oversight by tracking the number of individuals and groups crossing a defined line from a specified direction, with face redaction and employee exclusion available.

Gain actionable insights into customer visitation patterns, allowing for an improved understanding of peak times and customer preferences to enhance customer service and experience.

VISITATION PATTERNS

Identify high traffic times and strategically manage staffing.

CUSTOMERS SERVED

Track customers served for the building of key customer engagement areas.

EFFICIENT MANAGEMENT

Oversee operations from anywhere on any device.
