

OPERATIONAL ANALYTICS

Wait Time Detection

Improve customer experience and speed of service by monitoring when person or vehicle wait times exceed acceptable limits.

Track the time customers spend in designated regions of interest, such as checkout lines or service counters, with proactive alerts when these times exceed a defined threshold.

MEASURABLE EFFICIENCY

Track transaction durations, queue wait times, and display engagement.

CUSTOMER SATISFACTION

Respond to excessive durations for service and be notified when intervention is needed.

REMOTE MANAGEMENT

Oversee operations from anywhere on any device.
