

Retail Security Solutions

Whether it's a small boutique or a large franchise with hundreds of locations, there are operational priorities that all retail businesses share. These include reducing shrink, tracking customer foot traffic, managing user access, and monitoring properties remotely. Guardian Protection has the technology to address all this and more with our unified commercial security platform.

WHAT MATTERS MOST

Reducing Shrink

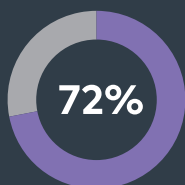

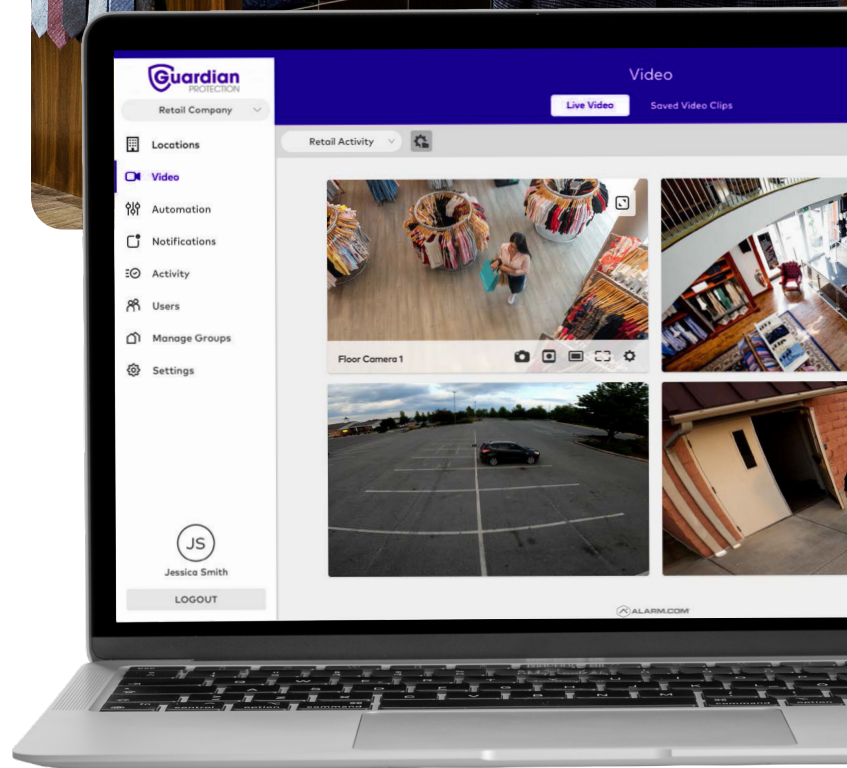

Decrease merchandise theft with an easy-to-use system that your loss prevention team can rely on.

Tracking Customer Foot Traffic

Gain actionable insights to improve staffing efficiency, optimize product placement and measure queue wait times.

Managing Employee Access

Keep track of employees or customers accessing business locations, while also monitoring and securing entryways.

72% of food and beverage businesses report that counting the number of customers entering or exiting the location is a "very" valuable capability.¹

Our Business Activity Analytics feature uses virtual tripwires and ground zones to determine net occupancy of spaces and wait lines and alerts you when capacity is reached.

A SOLUTION FOR ANY APPLICATION

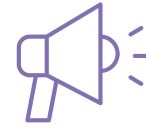

Retail Theft Prevention

Merchandise theft costs businesses about \$850 per year.² Guardian Protection technology can monitor high value product areas and send immediate alerts if prohibited areas are accessed.

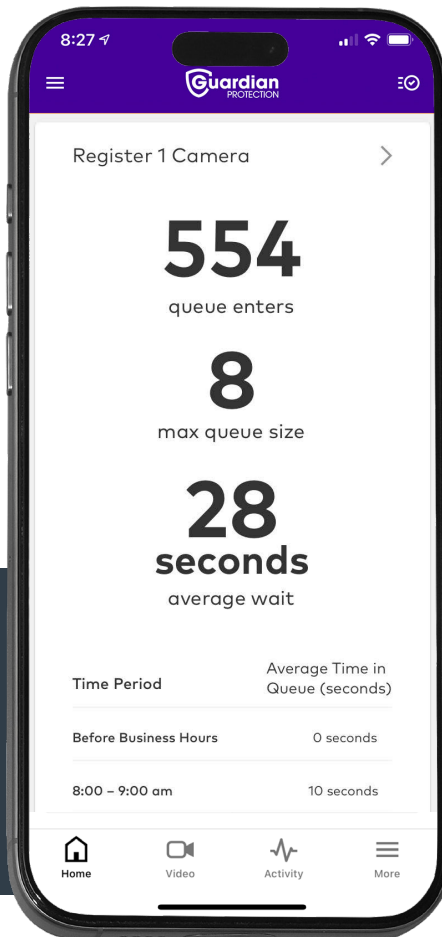

Operational Insight

See what's happening inside your business at all times and receive regular operational reports that help you make informed decisions.

User Code Management

Employees opening late and closing early cost businesses an average of \$1,400 per year.³ Avoid this with user activity alerts and get notified when an employee is opening late or closing early.

OPTIMIZE YOUR OPERATIONS

An All-In-One Solution

Keep track of it all on a single, intuitive interface with the Guardian EdgePremium Dashboard. View footage of your properties from anywhere, anytime with the easy-to-use mobile app.

You're in Good Company

Businesses of all sizes rely on Guardian Protection technology to help protect properties, people, inventory, and more.

Roughly 62% of retailers find it very appealing to use customer tracking data to determine how many employees to schedule for each shift.

With Guardian Protection, you can get data about checkout line lengths and customer wait times at your business, giving you insight into the number of employees you need to staff for coverage at specific times.
