Guardian
PROTECTION

Guardian Protection offers security solutions to multi-location businesses nationwide using industry-leading technology. Tell us your challenges and we'll design security and alarm monitoring solutions that suit your business needs, budget, and schedule.

With Guardian Protection, of course you get award-winning security, professional install, and 24/7 monitoring. You can also get:

- **INTRUSION DETECTION.** State-of-the art — but user-friendly — system helps protect against burglary and vandalism. In an emergency, police can be alerted by our 24-hour monitoring center.

- **DIGITAL CAMERA SYSTEM (CCTV).** View live and recorded video surveillance anytime, anywhere from your smartphone, tablet, or computer.

- **FIRE ALARM SYSTEM.** Our systems include 24-hour monitored fire sprinkler systems, or fire alarm detection devices such as commercial-grade smoke and heat detectors and manual pull stations.

- **ACCESS CONTROL.** Helps eliminate the need for spare keys and control employee access. Includes card access, photo badges, iris scanning, and fingerprint ID.

SMART SECURITY FOR ANY TYPE OF BUSINESS.

Coronavirus (COVID-19) Precautions

Life safety is our number one priority. We are closely monitoring developments related to COVID and taking additional precautions to help protect our customers and employees.

Our heightened safety measures include:

- Personal protective equipment (PPE)
- Enhanced cleanliness & hygiene standards
- Hand sanitizer before & after service visits
- Social distancing & no-contact appointments
- Eliminating unnecessary business travel

EdgePro

Standard security system management tool that provides easy oversight for multi-location businesses. Its responsive design makes managing your business security simple — no matter where you are.

QUICK LOOK DASHBOARD

EdgePro's dashboard displays a quick summary of your account and a status of all your locations. Critical security data is provided to you in an organized, easy-to-digest format.
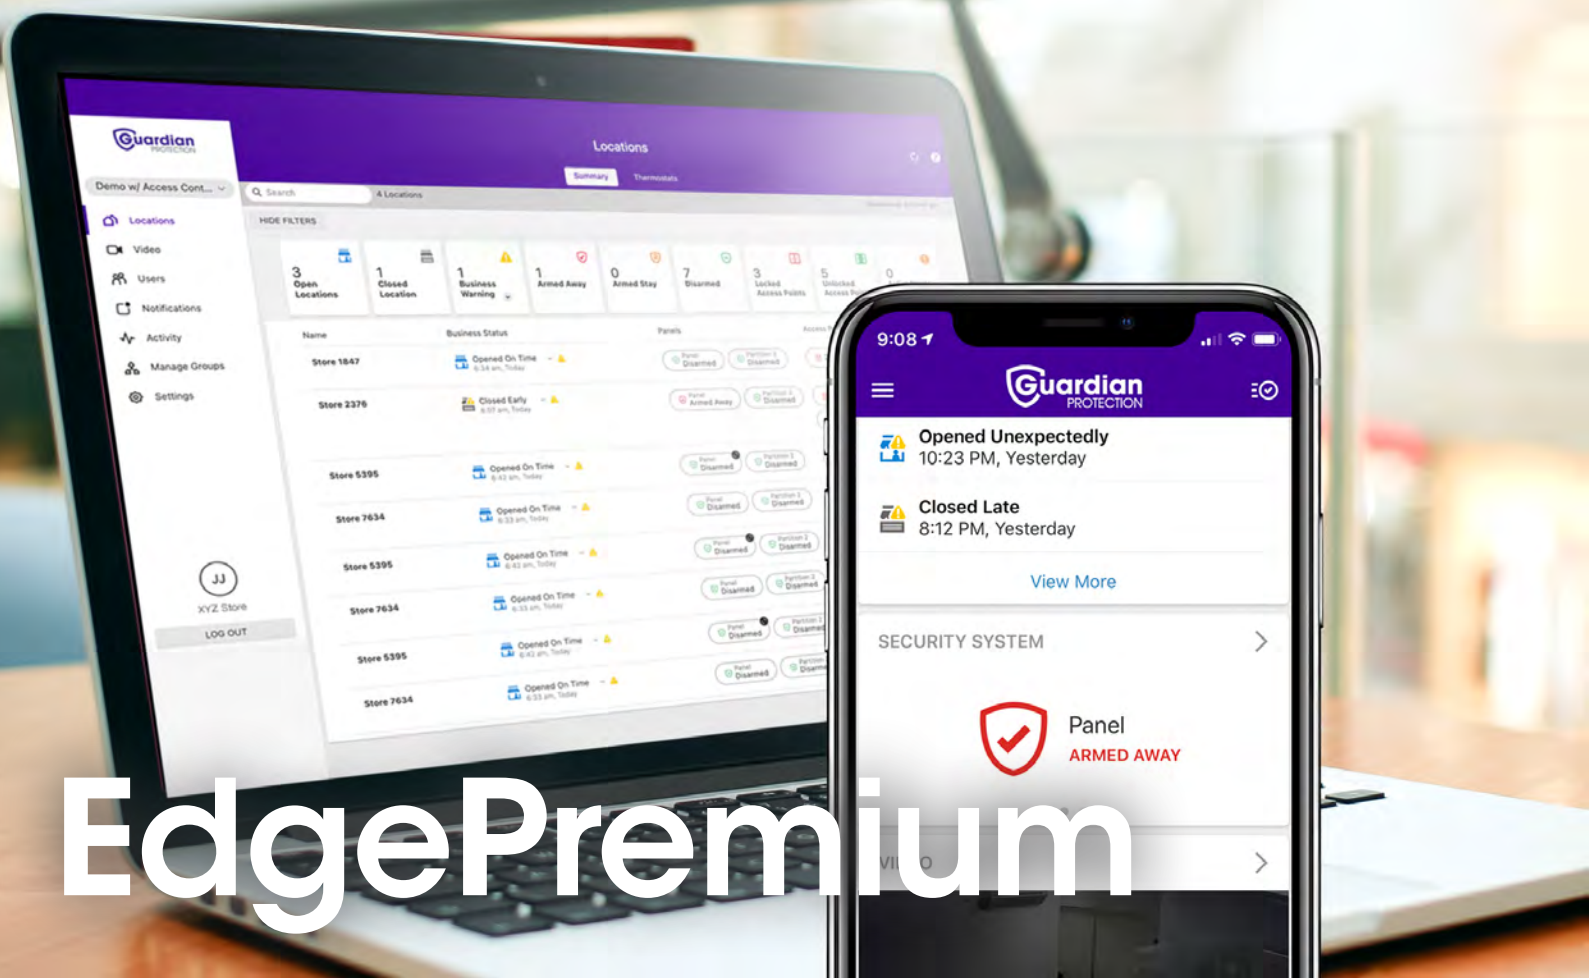

CENTRALIZED MANAGEMENT

Does your current security provider take days to process alarm code changes? With EdgePro's real-time action feature, you have the power to add, delete, and modify employee alarm user codes. It's fast and hassle-free.

ONE-CLICK REPORTS

Receive reports and data as often as you like, including alarm history, dispatches, open/close occurrences, and service requests. Customizable one-click reports give you faster insights and help guide business decisions.

REMOTE ACCESS

Easily access your account and manage your security systems and personnel anytime, anywhere from your desktop or laptop. Remotely assign authority levels for your team, place systems on test, and more.

EdgePremium

Engineered for businesses of all sizes, the EdgePremium advanced security management tool features robust capabilities. Whether you oversee one site or multiple locations, it's easy to manage employee access and security system functions through the web console or mobile app.

FULLY INTEGRATED ACCESS CONTROL

From storefronts to entire office buildings, secure your business against unauthorized access with EdgePremium. Features full integration of your security system and management tools in one place.

REAL-TIME ALERTS

Stay in the know with instant alerts about your business including arming, disarming, business opening and closing, alarms, power outages, and even unexpected activity.

VIDEO SURVEILLANCE & INTRUSION PROTECTION

See what's happening in and around your business with video surveillance streamed right to your mobile device or computer.

ROBUST BUSINESS INSIGHTS

Get visibility into activity trends to make smarter decisions around staffing, building access, activity patterns, peak periods, unexpected activity, and more.
