PASSWORD DEFINITIONS

We put this guide together to help you get the most out of your Guardian system.

Make sure you know and keep track of your important Guardian passwords and codes. Customers usually do one of the following:

- ✓ **Memorize**
- ✓ **Program into a cell phone**
- ✓ **Fill out this card and keep it somewhere safe**

Verbal Alarm Password Single word used to verify your identity when an alarm is triggered or when speaking to Guardian. This password gives you authority to make all changes on your account.

Master Panel Code Numeric code used to arm and disarm your security system at your panel.

Duress Code Numeric code that will disarm your security system at your panel, but silently notifies Guardian of an emergency.

Guardian's Monitoring Center:
1.800.776.8328

Scan the QR code above to add this number to your phone's contact list so you always know who's calling!

 **Verbal Alarm Password:** _____

 **Master Panel Code:** _____ - _____ - _____

 **Duress Code:** _____ - _____ - _____

ACCOUNT MANAGEMENT

Whether you need to pay your bill, sign up for autopay, test your security system, or request a new yard sign, we've got you covered. And you can do all of that online. Simply go to GuardianProtection.com and click '**gLogin**' at the top of the page.

1 ACCOUNT INFO AND BILLING

Make online payments, manage payment methods, enroll in autopay, and view past statements.

2 RESOURCES, VIDEOS, AND FAQs

Find answers to common questions and instructions on anything from changing a battery to control panel How To's.

3 YOUR ACTIVITY

See what's going on with your security system. View recent alarms, low battery signals, and upcoming appointments.

4 MANAGE EMERGENCY CONTACTS

Add, delete, and prioritize your emergency contacts. An emergency contact should be someone you trust with access to your home or business, who understands the operation of your alarm system, has a user code and knows your password.

5 TEST YOUR ACCOUNT

Keep your system healthy by testing it once a month.

WHAT TO EXPECT IF YOUR ALARM GOES OFF

Guardian Protection has security procedures in place that vary depending on the type of alarm. Here is what you can expect:

BURGLARY ALARM (IF NOT DISARMED)

1. Guardian calls your primary number (password required)
2. If unavailable, Guardian calls your secondary contact number (password required)
3. Guardian notifies Patrol Unit/Guard Service, if applicable
4. Guardian calls the police to notify them of your alarm
5. Guardian calls all of your remaining contacts

AUDIBLE PANIC

1. Guardian calls your primary number (password required)
2. Guardian notifies the police of your alarm (no additional contacts called)

SILENT PANIC AND DURESS

1. Guardian notifies the police of your alarm (your contacts won't be called)

BURGLARY ALARM (IF DISARMED)

1. Guardian still calls your primary number (password not required)
2. If you don't know your password or are having trouble with your system, we will connect you with Customer Care

FIRE & CARBON MONOXIDE ALARMS (RESIDENTIAL)

1. Guardian calls your primary number (password required)
2. Guardian notifies the fire department
3. Guardian calls all of your remaining contacts

MEDICAL ALARM

1. Guardian calls your primary number (password not required)
2. When applicable, Guardian calls EMS to notify them of your alarm (we will connect you with EMS after we give them your name and address)
3. Guardian calls your remaining contacts, if applicable

7-DAY ORIENTATION

Your new system will be in "orientation" mode for the first seven days so you can get comfortable using it without worrying about accidental alarms. Alarms received for fire and carbon monoxide devices will follow normal procedures. For all other alarms Guardian will call your primary number and will only notify emergency responders if you request it.

MORE FEATURES FOR A SMARTER HOME

Depending on your security system package and devices, you may see additional icons on your Guardian App home screen. Here are a few more smart devices you can control from your smartphone.

VIDEO DOORBELL

Always know who's at your front door, even when you're away from home. Receive alerts, view video footage, and use two-way voice to interact with visitors.

SMART LOCK

Lock or unlock your door remotely. Provide temporary codes for visitors for safe, keyless entry.

SMART VIDEO

Keep a close watch on your property day and night, viewing live or recorded videos from your smartphone.

SMART GARAGE DOOR

Never wonder, "Did I forget to close the garage door?" Open and close your garage remotely, and even receive alerts if it is left open.

SMART THERMOSTAT

Set ideal temperatures at home for every part of your day. Stay comfortable and save on energy costs.

SMART LIGHT CONTROL

Set lights to trigger on and off based on activity or time of day. Give your home a lived-in look even when you're not there.
